Purpose

There are situations where you need to move data from a Custom Object (CO) Record to its linked Contact Record. This simple step is not that simple or even possible using Oracle/Eloqua's out-of-the-box features. This is where this cloud action comes into play. With CO to Contact Updater (CO) Cloud Action, you can update Contact Records using linked CO data.

This document will show how this Cloud Action can be used inside Program Canvas (CO).

Set-up in Eloqua

Please follow these instructions to set up this cloud app in your Oracle Eloqua instance.

- Log in to Oracle Eloqua.
- Click on Get App below to install.

Description

Allows you to update Contact Records using linked CO data.

Services

Action : CO to Contact Updater (CO)

Allows you to update Contact Records using linked CO data.

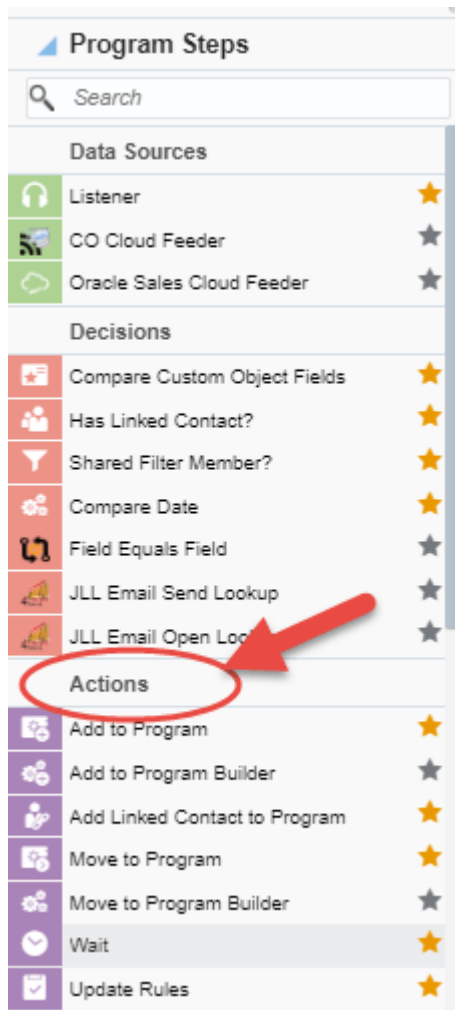

- You're all set. The cloud action is ready to be used.

How to use

The following instructions show a basic/simple usage. You can incorporate this Cloud Action into any existing Program canvas (CO).

- Create/Open a Program canvas (CO)
- Click on "Actions" on the top left side then "Show All Steps" and then locate the "Contact to CO Updater (CO)" Cloud Action under the Actions options (colored in purple).

- Drag and drop the cloud action to the canvas area. Connect the corresponding elements to the dropped cloud action

- Double click the CO to Contact Updater step, you will see some options for this element.
 - Rename the step if needed

- Click the pencil icon to open the settings for this step.

You will need a user ID to log in and configure this Cloud Action. If you don't have one, you can create one. If you do, use your user to Log In in the page shown in the following screenshot:

- Then click “Save Settings”.
- Recommended:** Create an element in the program in case an error happens, in this example it’s a Wait Step. Check the box to “Automatically route records with errors from cloud app”, select the step where you want the records to be routed.

- That's all. Activate the campaign, put some contacts in it and see the CO to Contact Updater(CO) Cloud App in Action!

License Information

You need a license to configure and execute this Cloud App. If you don't have a license, an error message will appear on the configuration page.

If you don't see CO Records being processed by the app, it may be because your license is missing or expired. To obtain a license, contact your account manager or [contact us](#).

- Each Eloqua instance requires a separate cloud app license.
- Each cloud app license includes a reasonable usage limitation of 250k records processed

daily and up to 5 app instantiations per Eloqua instance. Higher usage tiers are available at extra cost.

- For additional license details, please review the [Cloud Services User License Agreement](#).
