When Cetera Financial Group needed help getting their marketing automation platform migration project back on track, they turned to the team at 4Thought Marketing.

---

When customers show signs of disengagement, offering them the option to control the type and frequency of content provides the best chance of retaining their interest in the long run. One possible option is adding a snooze feature to your email preference center. Here's how we helped one of our clients do just that.

---

Incorporating artificial intelligence into marketing automation may help reshape how businesses interact with customers, optimize campaigns, and drive revenue growth. Today, we're looking at several key areas AI might impact the most.

---

Learn how to take your QA testing to the next level, and nerd out on the details building a snooze program with all the essentials. Office Hours.

---

Sales-influenced nurturing empowers your sales team to build stronger customer relationships and drive better results. Here's how to get started.

---

Inaccurate or outdated data can lead to ineffective campaigns, poor customer experiences, and wasted

---

resources. Real-time data validation offers a solution to these challenges. Today, we're exploring the concept of real-time data validation, its benefits, and practical implementation strategies in Eloqua.

---

In Eloqua, custom objects are excellent ways to store additional information about a contact. But sometimes, an integration, upload, or process adds COs without connecting them to Eloqua contact records. Here's how the CO to Contact Mapper Cloud App can help.

---

SORBS' sudden closure with no real explanation has ignited more than a few conversations. On a more practical level for email marketers, it's a good reminder to monitor and improve your email deliverability.

---

No "magic button" to guarantee form completion exists. However, Oracle Eloqua users have a powerful form design editor at their disposal to make the whole process easier to complete.

---

Personalized marketing materials still work wonders, but how can your company collect enough data for personalization without violating privacy laws? What's the balance between respecting user privacy and effectively using data? Let's explore these questions further.

---

Eloqua users already know how extensive its capabilities truly are. But what if it could do even more? That's possible when you pair Eloqua with another tool from Oracle: Oracle Unity CDP. Today, we're looking at a few important advantages this pair-up offers.
