---

Helps make list uploads quick and error-free by centralizing and eliminating manual pre-processing steps.

[Contact Us](#)

---

The Field Contains Cloud App helps improve data quality by comparing two fields to determine if the lookup field contains all or part of the source.

[Contact Us](#) [Free Trial](#)

---

The Field Equals Field Cloud App helps improve data quality by comparing fields to determine if they are identical.

[Contact Us](#) [Free Trial](#)

---

The Field Length Indicator Cloud App checks to see if a field length is less than or equal to the configured value and returns to the Yes or No path on your campaign or program canvas.

[Contact Us](#) [Free Trial](#)

---

The Force Field Length Cloud App truncates a field to a certain number of characters. The app can also pad a field value with spaces if it does not meet the minimum number of characters required.
